Relevant mega trends & drivers for the ITS industry...

... and how Kapsch TrafficCom addresses them.

Financing transportation networks.

Road infrastructure needs to be maintained and expanded.

According to a study by McKinsey Global Institute, around US\$ 900 billion must be invested annually in road infrastructure worldwide to keep pace with expected economic growth.

Mobility.

Mobility is a basic human need and an important prerequisite for the functioning of a market economy.

As prosperity increases, so does the volume of traffic.

This increases the demands placed on transportation systems.

Technology and concepts.

Radical change in transport industry with new technologies and concepts, e.g. e-mobility, Mobility as a Service (MaaS), connected vehicles, big data-based applications.

Urbanization.

Share of people living in cities is rising:

Since 2007: > 50% by 2030: > 60% Urban population:

Today: 4.2 billion by 2030: 5.2 billion

Environmental protection.

Air pollution has significant effects on human health, impacts vegetation and ecosystems, contributes to climate change and damages materials and buildings.

Road traffic plays an important role here.

Change of the ITS industry.

Convergence of the various ITS market segments calls for intelligent, holistic mobility solutions.

Kapsch TrafficCom's approach.

Help deal with traffic flows more efficiently by:

- collecting charges for the use of road infrastructure (ETC segment),
- managing traffic (IMS),
- applying traffic safety and security solutions (IMS).
- expanding from ITS to intelligent, holistic mobility solutions (both segments).

We want to make road traffic safer, more reliable, more efficient and more convenient, while reducing the environmental impact.

Kapsch TrafficCom – reducing the risk profile: less dependent on few large customers.

2007/08 (IPO)

- Mainly tolling business
- Only a few customers
- Very limited traffic management activities
- Business in Europe. Australia and Chile

2012/13

- Mainly tolling business
- Strong ETC growth driven by a few largescale customers
- Little non-ETC business
- > In total <200 customer projects
- Growing share of business in the Americas

Today

- Mainly tolling business
- Customer base significantly diversified (also within ETC)
- Non-ETC portfolio massively expanded

IFRS 16.

Overview.

IFRS 16 "Leases".

- > Specifies the recognition, measurement, presentation as well as disclosure requirements with regard to leases in financial statements.
- As for Kapsch TrafficCom, this mainly relates to: buildings, motor vehicles, and IT equipment.

Rights of use arising from leasing agreements are capitalized (tangible assets), and lease liabilities are shown separately on the liabilities side of the balance sheet.

Lease expenses recorded previously (other operating expenses) are replaced by a depreciation of the assets from leasing and an interest component (which flows into the financial result).
