Relevant mega trends & drivers for the ITS industry...

... and how Kapsch TrafficCom addresses them.

Financing transportation networks.

Road infrastructure needs to be maintained and expanded.

Around US\$ 900 billion* must be invested annually in road infrastructure worldwide to keep pace with expected economic growth.

*Study by McKinsey Global Institute

Mobility.

Mobility is a basic human need and an important prerequisite for the functioning of a market economy.

As prosperity increases, so does the volume of traffic.

This increases the demands placed on transportation systems.

Technology and concepts.

Radical change in transport industry with new technologies and concepts.

Examples: e-mobility, Mobility as a Service (MaaS), connected vehicles, big data-based applications.

Urbanization.

Share of people living in cities: since 2007: > 50% by 2030: > 60%

Urban population:

today: 4.2 billion by 2030: 5.2 billion

Environmental protection.

Air pollution has significant effects on human health, impacts vegetation and ecosystems, contributes to climate change and damages materials and buildings.

Road traffic plays an important role here.

Change of the ITS industry.

Convergence of various ITS market segments.

Trend towards intelligent, holistic mobility solutions.

Kapsch TrafficCom's approach.

Help deal with traffic flows more efficiently by:

- collecting charges for the use of road infrastructure (ETC segment),
- managing traffic (IMS),
- applying traffic safety and security solutions (IMS).
- expanding from ITS to intelligent, holistic mobility solutions (both segments).

We want to make road traffic safer, more reliable, more efficient and more convenient, while reducing the environmental impact.

Feb 2020 | Investor Presentation

Going through a phase of change.

US staff shortage retards growth.

- At the beginning of FY 2019/20, about 150 vacant positions.
- In H1 2019/20, number of employees in the USA rose by 70 to 714.
- Costs for recruitment, onboarding, third-party support.
- Impact on earnings at least until H1 2020/21.

Large contracts ended in 2019.

- Czech Republic. Contract with annual revenues of EUR 70+ million and good profitability expired.
- Germany.
 Contracts regarding the infrastructure charge (passenger vehicle toll) terminated.

Regulatory challenges in Zambia.

- Due to continuing regulatory issues, the intended automated flow of funds from operations to our accounts is not yet possible.
- Lengthy discussions with the administration.
- Operations at minimum intensity as long as this matter has not been solved.

Prepared for profitable growth.

Customers and projects.

- Kapsch TrafficCom addresses mega trends.
- Plenty of business available in target markets, in particular in the US.
- > Additional potential from
 - new technologies
 (e.g. connected mobility) and
 - offerings to new customer groups (B2C in the US).

Top technology.

- > Driver of technological innovation.
- Total expenses for developments correspond to 15% of annual revenues.
- More than 1,200 patents.

Quality of people.

- Lot of talent within the Group.
- Domain know-how.
- Global set up.

USP.

What makes Kapsch TrafficCom unique?

- > Ability to develop tailored solutions proven track record
- Close to our customers
- Domain know-how

Overview

IFRS 16 "Leases".

- Specifies the recognition, measurement, presentation as well as disclosure requirements with regard to leases in financial statements.
- As for Kapsch TrafficCom, this mainly relates to: buildings, motor vehicles, and IT equipment.

Rights of use arising from leasing agreements are capitalized (tangible assets), and lease liabilities are shown separately on the liabilities side of the balance sheet.

Lease expenses recorded previously (other operating expenses) are replaced by a depreciation of the assets from leasing and an interest component (which flows into the financial result).
